

Happy September! Are you ready for fall?

This month we released a lot of new content (and we're excited to share it with you)! Our Developer Relations team published two new JavaScript starter guides featuring Remix and React. We also interviewed some members of our Engineering team to provide a glimpse into what working at Contentful is like. And, of course, we're continuing to sponsor and speak at various events.

Check out all of the updates below!

CONTENTFUL CORNER

The way we work: Engineering at Contentful

Curious about how we handle production fails? Want to know what growth opportunities exist within Contentful? In this blog post, Claire Baah-Danso, a member of our Recruitment team, recaps an interview with Jigyasa and Jeremy, two of our awesome Engineering Directors!

Remix + Contentful starter guide

Build a corgi-themed portfolio with Developer Advocate [Harshil Agrawal](#) to learn what's possible with Remix and Contentful.

React + Contentful starter guide

This starter is perfect for those that prefer the original framework. Harshil demonstrates what you can do with just React while building an image gallery.

The ultimate guide to Contentful webhooks

Webhooks are an awesome tool and can really unlock what's possible with Contentful. In this post, you'll learn how to create your own webhooks or build off our many templates.

What is TypeScript and why should you use it?

Want to learn more about TypeScript? This guide from Harshil provides an overview, rundown of important features, and tips for your first project using it.

What's a framework? All about software frameworks

We're big on frameworks at Contentful, but what does "framework" mean, exactly? This blog post defines the concept and goes over some of our favorite frameworks to date.

[A hands-on tutorial for using Contentful with Vue](#)

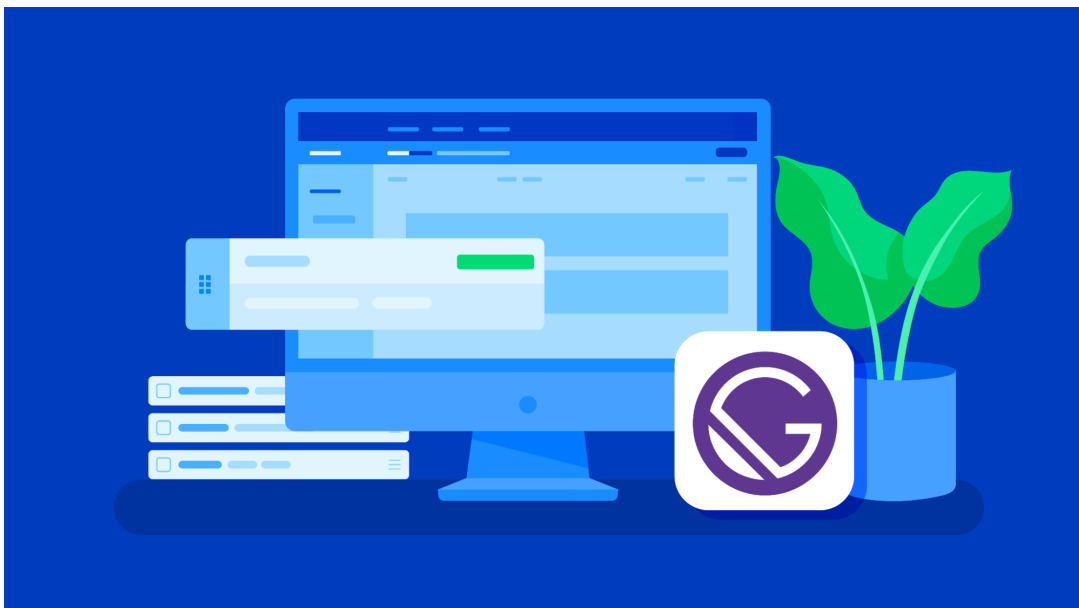

If ecommerce is your jam, this Vue tutorial walks you through how to build a handbag store, from displaying products to setting up a shopping cart.

[How to get started using Angular with Contentful](#)

Did you think we were done with frameworks? Think again! Our last tutorial covers how to use Angular and Contentful to build a job listing site.

EVENTS

Here's what's happening across Contentful!

On Sept. 8, Contentful Senior Software Engineer David Fateh and Webstack Marketing Operations Lead Adam Buettner discussed how Webstacks used Contentful and Gatsby to increase demo and website speeds for their client, ServiceTitan. [Check out the webinar recording.](#)

We're super excited to sponsor Algolia DevCon Sept. 14-15. By the time you see this newsletter, we'll be at our virtual booth. [Sign up for the event](#) and drop by to say hi!

[Contentful developer livestreams](#)

Join us live on Tuesdays at 11 a.m. ET/5 p.m. CET for our Contentful developer stream. We'll be building fun projects live, testing new Contentful features, and interviewing cool people. We'd love to connect!

Visit our [developer events page](#) to stay up to date on future events.

LINKS WE LIKE

GitHub visualizer

If you like data, you'll love this! [Jo Franchetti](#) created this awesome GitHub commit visualizer that displays updates in real time!

CHANGELOG

Manage content views and folders programmatically

[Views and folders](#) can now be programmatically managed using our Content Management API. Previously, views and folders were only manageable through our web app. Learn how to create and update a view in our [CMA reference documentation](#).

COME JOIN OUR TEAM

If scaling products and working on busy GraphQL endpoints is your thing, let's talk! Costa Coffee, Rapha, EA, and thousands of other companies use Contentful daily. As we scale to support the world's leading API-first content platform, we're hiring for these roles:

Senior Frontend Engineer - React – Remote United States

As one of the first frontend software engineers on the U.S. integrations team, you'll help build the team by providing guidance and coaching other engineers. You'll also gain exposure to a range of technologies and approaches not limited to frontend development.

Explore [our careers page](#) for other open roles — apply yourself or make referrals. We'd love to have you on our team!

That's it for September!

Visit [our developer portal](#) for even more news. The portal also houses developer blog posts, videos and tutorials. Check out [our Developer Showcase](#) to see what developers have built with Contentful and to submit your own projects. As always, feel free to contact us on [Slack](#) or [Twitter](#) to let us know how we can better support your awesome builds.
